# enJOY

A Virtual Bible Study Series

The enJOY virtual Bible Study is a unique way to immerse yourself in God's Word while being a part of a community of women across the globe from the comfort of wherever you find yourself. This is especially convenient in today's fast-paced culture but also helpful for those on the go. While we believe in the power of gathering with other believers in a church body, we are thankful for the flexibility of technology through outlets such as social media. This enables us to hold a weekly Bible Study that doesn't bind you to a commute or require a specific geographic location. enJOY is held weekly on Wednesdays at 12:00 pm CST for ladies with various options to join live or play back at their convenience. You are invited to join enJOY by subscribing to our weekly newsletter on our website and/or requesting to join our private Facebook group *enJOY by Experience ELLE*.

## Revival POP-UP

The Experience ELLE team will come to your home, business, church or indoor-outdoor venue and usher in an atmosphere where the presence of Jesus is welcome. These on-location meetings will encompass worship, preaching/teaching from the Bible, and a time of prayer. In our more extensive meetings, Tiffany shares her personal testimony as it relates to education on mental health and suicide awareness + survivorship. Our mission for the Pop-Up, as expressed in Luke 4:18, is to win souls, bring healing to the broken-hearted and freedom for the oppressed. In our meetings, we have seen the anointing of the Holy Spirit set people free from depression and suicidal thoughts. A booking request form is available for you on our website. Upon completion, we will together customize the pop-up based on your specific need.

## The ELLE FOUNDATION

The purpose of our foundation is to educate people around the world and the communities they serve to overcome the stigma attached to mental illness and suicide awareness. This foundational awareness of brain health was established through 20+ years of research, certifications, and the application and usage of the natural, organic and holistic resources from the Lord's creation. These resources include but are not limited to: holistic nutrition, exercise, trauma counseling, inner-healing, life-coaching, essential oils, supplements and spiritual care to bring optimal wellness to the spirit, soul and body through the love of Christ. The primary goal of this division of the non-profit is to provide financial assistance toward holistic care for those suffering with mental health disease. It is our desire to facilitate a healing regimen for those in need of wholeness and well-being. You can learn more about the naturopathic resources we offer by visiting our website.
